PVC Traditional Rail with Square Balusters

- A. Distinct lines add definition to the rail**
- B. Interior patented engineering webbed cross section increases strength**
- C. Thickness of rail wall enhances the durability**
- D. Aluminum stiffeners add additional stability and strength**

Vinyl rails and fence products are a smart choice for those who want to beautify their home and eliminate the need for the traditional maintenance programs that are required for wood products year after year. Not only does our rail look great, but it is what's inside that makes all of the difference. Don't be fooled by the look-a-like rails. What makes the Phoenix Rail unique is the patented engineering of the webbing inside the Alzar T-Rail. It's designed for strength. You won't see that in other T-Rails. We've also added an aluminum stiffener even though we exceeded the strength requirements for all of the building codes.

Our rail system components are extruded in compliance with ASTM (F-964-94). All of our components are made with the highest quality ingredients. Titanium Dioxide (TiO2) is the compound that protects the rail from the UV rays. Here at Phoenix Manufacturing, Inc., we insist that all of our products contain 10 parts of TiO2. With this maximum amount of TiO2, your PVC rail will **never** yellow. **It's guaranteed!**

The ORIGINAL Mahogany & PVC Rail System

Mahogany Classical Rail with Colonial Balusters

For those who have not given up on the old world craftsmanship, we have a mahogany top rail integrated with our PVC baluster and bottom rail. This keeps the maintenance factor at a minimum to just the top mahogany rail. The mahogany can be stained to match your front door or deck which adds a distinct accent to your home. Also we have made the mahogany top rail as easy to install as our vinyl rail.

If you are looking for an **All Wood Railing**, Phoenix is now offering an all new **Bigger and Bolder** Mahogany Wood Railing System, which is available by the foot.

The three things that contractors have consistently said about the **PHOENIX RAIL SYSTEM** are:

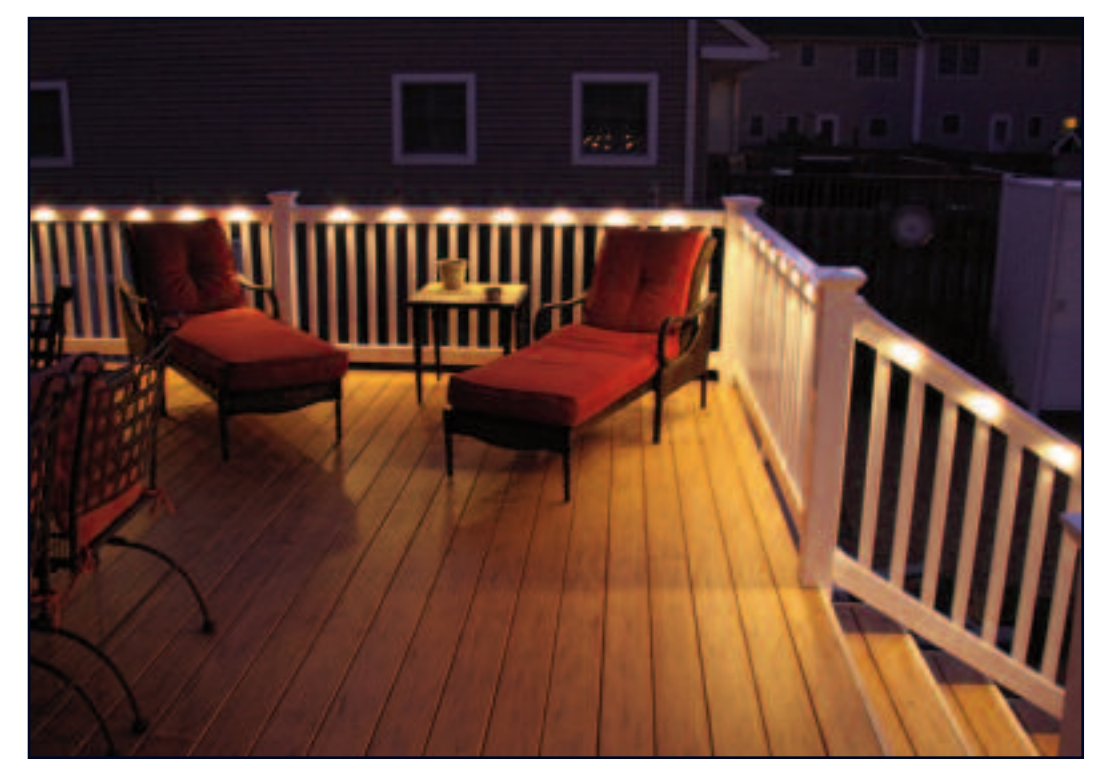

PVC Traditional Rail with Glass Panels.

1. "It's the nicest looking Rail System on the market today."
2. "It's the strongest Rail System we've ever used."
3. "It's the easiest Rail System to assemble."

There are many more benefits to using the **PHOENIX RAIL SYSTEMS**, such as:

- Low maintenance
- Lifetime, transferable warranty
- Code compliant
- Affordable
- Ability to accent your house with a Mahogany top rail
- Quick and easy installation
- Creative designs
